

Bright Ideas!

LED and Residential Lighting

LED has been a commercial product until recently. Since it is relatively new in the residential market, this presentation will teach more information on how to plan LED lighting for your project. Local Lighting Consultant, **Pat Tomlinson**, will help you discover some of the limitations of this revolutionary lighting technology. Come find ways to light up your project.

- Registration 6:00-6:30
- Presentation 6:30-7:00
- Drawings & Announcements 7:30-8:00

Food, Beverages & Door Prizes
